Continuation of 2(b) Other: The amendment fails to specify whether the abstract is to be amended or replaced. Amendments to the specification, including the abstract, must be made by presenting a replacement paragraph or section or abstract marked up to show changes made relative to the immediate prior version. Newly added paragraphs or sections, including a new abstract (instead of a replacement abstract), must not be undelrined. In summary, if the abstract is being AMENDED, it must be marked-up to show the cahnges made. If the abstract is being REPLACED, a clean copy is required. Compliance cannot be determined because applicant's intent is not specified.
